

Sarthak Panigrahi

Full Stack Developer (MERN) | TypeScript | AI-Integrated Web Applications

Pune, India | +91 77968 11892 | sarthakpanigrahi2218@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

I'm a final-year Computer Science Engineering student who enjoys building full-stack web applications with the MERN stack and TypeScript. Over the past year I've worked on projects that combine REST API development, secure authentication, and AI integration, taking each one from database design through to deployment. I like figuring out how things work end to end, and I'm looking for a Software Engineer or Full Stack Developer role where I can keep building real, useful products and grow as a developer.

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript (ES6+), Java, HTML5, CSS3
- Frontend: React.js, Redux Toolkit, Tailwind CSS, Responsive Web Design
- Backend: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt
- Databases: MongoDB, Mongoose, NoSQL Data Modeling
- AI / Tools: Gemini API, Claude Code, Postman, Git, GitHub, Vercel
- Core Concepts: OOP, MVC Architecture, CRUD, Agile Development.

EXPERIENCE

Full Stack Developer Intern — AB Infotech Solutions Pvt. Ltd.

July 2026 – Present

- Worked on building a multi-agent AI assistant for the banking domain using Retrieval-Augmented Generation (RAG) to provide context-aware responses.
- Contributed to backend development, AI integration, and connecting application components to support efficient and reliable functionality.
- Collaborated with the engineering team to implement features, work with existing codebases, and follow software development best practices.

Generative AI Virtual Intern — EduSkills

April 2026 – June 2026

- Explored Machine Learning with AWS, ML applications, NLP techniques, and advanced NLP concepts through structured learning modules.
- Applied Generative AI and NLP concepts to practical learning exercises, gaining exposure to AI-driven applications and implementation

PROJECTS

NexHire — AI-Powered Career SaaS Platform

React.js | TypeScript | Node.js | Express.js | MongoDB

- Built a full-stack AI-powered SaaS platform for resume analysis, ATS scoring, job matching, and interview preparation using the Google Gemini API.
- Implemented AI-driven features, JWT authentication, PDF resume parsing, RESTful APIs, and Razorpay payment integration.
- Developed responsive web applications using the MERN stack, TypeScript, and Tailwind CSS, with MongoDB for database management.

Dhekhona — Blog Web Application

React.js | Node.js / MongoDB | Express.js

- Built a full-stack blogging platform where users can sign up securely and create, edit, and delete posts, with authentication handled through JWT and bcrypt.
- Built the front end in React with a component-based structure, and deployed the whole application on Vercel.
- Set up protected routes and token-based sessions so only logged-in users could access certain pages, following a clean REST API structure.

EDUCATION

B.Tech in Computer Science Engineering — JSPM University, Pune

2023 – 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Software Engineering

CERTIFICATIONS

- HackerRank — JavaScript Certification
- GitHub Foundations Certification
